

PRESS NOTE

Saipem: FTSE4Good confirms Saipem in the Sustainability Index for the eighth year running

San Donato Milanese, August 9, 2017 - For the eighth year running, Saipem has been included in the FTSE4Good Sustainability Index which assesses the performances of companies in relation to environmental, social and governance issues through an analysis of the suitability of the company's system and its observance of stringent requirements.

In highlighting the best practices implemented by Saipem, the assessment also noted a constant and significant improvement in Saipem's performance, and this in turn led to recognition of Saipem as a leading company in its sector of activity.

This acknowledgement is a result of Saipem's efforts to pursue constant technological innovation, the fight against corruption, the promotion of human and labour rights in the countries where it operates, as well as responsible management of its supply chain and a focus on environment, health and safety. This commitment was further underlined last year following Saipem's acceptance into the Global Compact initiative of the United Nations.

Saipem is a world leader in drilling services, as well as in the engineering, procurement, construction and installation of pipelines and complex projects, onshore and offshore, in the oil & gas market. The company has distinctive competences in operations in harsh environments, remote areas and deep water. Saipem provides a full range of services with "EPC" and "EPCI" contracts (on a "turn-key" basis) and has distinctive capabilities and unique assets with a high technological content.
