

We are committed to the United Nations Global Compact because we want to turn our impact in the Countries where we operate into real opportunities for sustainable development.

Our commitment to the Global Compact starts from our inclusion of the Ten Principles in our basic values, and applying them concretely in our business strategy and in all our operating initiatives: we safeguard and promote human rights and the rights of workers, maintaining responsible conduct in our encounters with all our personnel; we are committed to constant collaboration with our suppliers to ensure a supply chain that is ethically correct and reliable; we focus on technological innovation to reduce our environmental impact to a minimum and we have developed the most advanced governance structures so as to actively prevent any episodes of corruption.

In addition to the UNGC Ten Principles, we are contributing actively to the realisation of the 2030 Agenda for Sustainable Development of the planet, and in particular to the attainment of the Sustainable Development Goals (SDGs) applicable to our business and operations.

We have mapped the progress that the company has made during the year with respect to the SDGs to give an overall view, supported by numbers and facts, of Saipem's contribution in creating shared value for the society and the stakeholders, maximising the positive contribution of the company and minimising the negative effects due to the company activities.

The data in this report relates to the fiscal year ending December 31, 2024, unless otherwise stated.

For information regarding reporting boundaries refer to CSS24.

(a) 2024 data have been calculated in relation to the "CSRD Total Group" perimeter that differs from the "Total Group" perimeter used for previous years' data including activities, for example, carried out at sites or offices environmentally managed by third parties and sites over which Saipem has operational control, in accordance with CSRD regulation, that is relevant activities over which the company exercises significant influence. The difference between the "CSRD Total Group" and the "Total Group" perimeters does not allow for full comparability of the underlying data or the derivation of related trends.
(\*) It is specified that the unit of measurement for 2024 refers to MWh of primary energy and not electric MWh. It is calculated by applying the following conversion factor: 1 toe = 11.63 MWh, as given by the International Energy Agency. (\*\*) Category introduced in 2023.
